CARGILL: DON'T PAVE MY BAY!

Agribusiness giant Cargill Inc. is planning to build a massive development on more than 1,400 acres of restorable Bay salt ponds in Redwood City with a proposal to build up to 12,000 units of housing to attract 25,000 new residents.

Urban sprawl, massive Bay fill and diking have already reduced the Bay's size by one-third and destroyed more than 90 percent of the Bay's wetlands. These ponds should be restored to natural habitat to benefit people and wildlife.

Join Save The Bay, Sierra Club, Friends of Redwood City, Committee for Green Foothills, Citizens Committee to Complete the Refuge, Sequoia Audubon Society and Friends of Bedwell Bayfront Park.

Sign the petition: *We oppose Cargill and DMB's massive proposed Bay salt pond development in Redwood City. The project would put new development in the path of rising sea levels and destroy Bay shoreline open space that should be restored. This is not an infill site and is not the place for housing and commercial development; Redwood City should continue its smart growth redevelopment downtown. We urge Redwood City, state and federal agencies to reject the project and promote full restoration and protection of habitat and open space on this site.*
